Education

B.Tech (Hons.) in Computer Science & Engineering — UPES, Dehradun CGPA: 8.63	Aug 2023 – Present
12th (ISC) — Lucknow Public School, Lucknow 86.5%	Apr 2021 – May 2022
10th (ICSE) — Lucknow Public School, Lucknow 91.4%	Apr 2019 – May 2020

Technical Skills

Programming & Scripting: Python, Java, C, Bash
Security Tools: Wireshark, Burp Suite, Nmap, SQLMap
Web & Backend: HTML, CSS, JavaScript, MySQL

Internships

Cybersecurity Intern — Yadki Infotech Pvt. Ltd. | 8 Weeks Jun 2026 – Jul 2026
Skills: Vulnerability Assessment, Security Monitoring, Cybersecurity Frameworks, Documentation

- Assisted in vulnerability assessments, security monitoring, and analysis of cybersecurity threats while supporting the implementation of security controls and cybersecurity best practices.
- Monitored security logs and incidents, contributed to basic penetration testing, and prepared security reports, documentation, and compliance records to support security operations.

Cybersecurity Intern — Infosec Dot | 8 Weeks Jun 2025 – Jul 2025
Skills: Networking, Digital Forensics, YARA Rules

- Performed malware traffic analysis using Wireshark to identify anomalies and threats in network traffic.
- Assisted in vulnerability assessments on Linux systems using Nmap, OpenVAS, and Burp Suite.

Projects

Cloud Security Governance Platform Jun 2026 – July 2026
Tech Stack: React, TypeScript, Vite, Tailwind CSS, Framer Motion, Recharts, Node.js, Express.js

- Built a Cloud Security Governance Platform to monitor multi-cloud security posture, compliance, risk, and asset inventory across AWS, Azure, and GCP through interactive dashboards and visual analytics.
- Implemented governance and compliance capabilities including findings management, policy tracking, ISO 27001/NIST CSF/CIS alignment, executive reporting, and a mock API backend simulating enterprise cloud security workflows.

SentriAI – AI Security Evaluation Platform May 2026 – Jun 2026
Tech Stack: React, Tailwind CSS, Vite, REST APIs, LLM APIs, MITRE ATLAS

- Developed a provider-agnostic AI Security Evaluation Platform to assess Large Language Models (LLMs) against Prompt Injection, Jailbreaks, Hallucinations, Data Exfiltration, and Behavioral Drift using real-time security analytics.
- Built interactive dashboards featuring security scoring, threat intelligence, MITRE ATLAS technique mapping, compliance reporting, and support for both simulation and live API-based LLM evaluation.

Network-Based Malware Forensics Using Machine Learning Techniques Jan 2026 – Apr 2026
Tech Stack: Python, Wireshark, YARA Rules, VM

- Built a malware forensics system analyzing custom malware samples in controlled VM environment using static and dynamic techniques.
- Extracted behavioral and network-level features; trained and evaluated ML models achieving accurate malware detection and classification.

Research and Publications

Copyright (Registered) — Wrist Band Based Authentication System Jun 2026
Registered copyright for a wearable biometric attendance system using fingerprint authentication and encrypted communication.

Research Paper — Malware Detection and Analysis: A Comprehensive Study Nov 2025
Published in: Current Trends and Advancement on Cyber Security and Digital Forensics

Analyzed static, dynamic, and AI-based malware detection techniques with privacy-preserving approaches including VMI

Certifications and Achievements

- Achieved a top 1% global rank on TryHackMe.
- Completed 150+ LeetCode problems and achieved a 100-day coding streak badge.
- Achieved Champion Milestone Tier in Google Cloud Arcade, earning official Google goodies.
